Navy sailor becomes new Marine pilot

By Jessica Yamada
Daily Staff Writer

Sailors leave the Navy all the time, but it's not all the time that they leave to go into the Marines.

Chris Hay, a Cal Poly graduate and Navy reserve petty officer, was selected to the Marine Corps Aviation Officer Candidate Program.

"This was his life-dream. When he was finally accepted, he was so stoked. He's actually going out and doing it. I know he's going to be a great pilot," said Hay's friend Matt Manzer, who is a junior physical science major.

Manzer, President of Kappa Chi, said they were in the fraternity together.

"Chris was also on the Cal Poly rugby team for four years, a member of Alpha Zeta, an honorary agriculture fraternity (member) and Naval reserve (member) while he was at Poly," Manzer said. "He's a very determined guy, he has a lot of spirit and is a good leader."

Hay graduated from Cal Poly in 1994 with a bachelor's degree in agribusiness.

"He would be a perfect marine pilot," said Ken Scott, one of Hay's agribusiness professors. "He reminded me of the kind of kid who had a good sense of organization."

Scott said Hay probably studied agribusiness because that would be a good career alternative if he were not able to be a pilot.

Hay is currently in intensive training for 18 months in Virginia and wouldn't want to be anywhere else, according to a Navy press release.

Because he is currently in

Cal Poly graduate Chris Hay, a Navy reserve petty officer, plans to leave the Navy because he was recently selected to the Marine Corps Aviation Officer Candidate Program / Photo courtesy of the U.S. Navy

training, Hay was unavailable to comment about his recent success.

He will receive his officer commission, then go through leadership training, combat tactics, survival and primary flight

courses.

He will learn to fly the T-34C Mentor, a two-seater, single engine, turboprop airplane used exclusively for training new pilots, according to Navy journalist Denise Garcia.

Buchanan, Gramm fight for first votes of 1996 campaign

By John King
Associated Press

BATON ROUGE, La. — Phil Gramm and Pat Buchanan battled for conservative support Tuesday as Louisiana Republicans cast the first votes of the 1996 presidential race but had limited choices because most candidates refused to participate.

The first 21 delegates to the Republican National Convention were at stake, but most of the GOP field stayed away to assuage state GOP leaders and activists in Iowa, which holds its presidential caucuses next Monday and traditionally has gone first in the nominating chase.

Those boycotting included Senate Majority Leader Bob Dole, publishing heir Steve Forbes, former Tennessee Gov. Lamar Alexander and Indiana Sen. Dick Lugar. Only Gramm and Buchanan filed full slates of delegates in Louisiana; anti-abortion candidate Alan Keyes filed partial slates.

Gramm, a Texas senator, was

heavily favored because of deep support in the state GOP establishment, and Buchanan complained to the end that the process was tilted in Gramm's favor.

At one New Orleans polling site, a Gramm banner hung over voting machines and a Gramm campaign video played on two televisions. "Seems kind of tanked, doesn't it?" Buchanan supporter Les Leonard said after voting there.

Campaigning early Tuesday in Iowa before traveling to Louisiana, Gramm said he would consider getting 11 delegates a victory. That was a far cry from earlier predictions he would get all or most of the 21 delegates.

"I intend to get up Wednesday morning, come to Iowa and campaign hard every day if I don't get one delegate," Gramm said. "But I'll have a little more bounce in my step, I'll have a little broader smile on my face if we win than if we lose."

Presidents' holiday no break for Poly students

By Jon Brooks
Daily Staff Writer

For those of you already dreaming of a long skiing weekend, there's no three-day break for Presidents' Day this quarter.

Cal Poly administration has moved the normal Presidents' Day holiday to the last Friday before finals week. Bonnie Long, administrative assistant to the vice president for Academic Affairs, said there has already been some grumbling from students and faculty on the loss of the three-day weekend.

"The faculty and the students didn't like the loss of a three-day weekend. We're looking for alternatives in the future," Long said.

Laura Freberg, chair of the Academic Senate instruction committee, said the holiday was moved so students would not miss three Monday classes during winter quarter.

"The concern was that students were missing too many Monday classes, especially in the winter quarter," Freberg said. "Classes that met once a week on Mondays were missing 30 percent of their instruction time — that's devastating."

"Reading day," a term used at other colleges for a designated day of student study, was instituted by former Vice-President for Academic Affairs Robert Koob, Freberg said. However,

there was a large outcry among faculty members because they were not included in the decision-making process concerning the new reading day, she said.

Since then, Freberg said, reading day has been canceled for future quarters and the instructional committee is looking for an alternative to the problem.

Freberg said she has been researching the alternatives that could be used in place of the current schedule. The options cover everything from not changing the schedule, to taking a four-day holiday.

Freberg said the most popular option has been switching a Monday class schedule for a Tuesday. The switch would occur one time during the quarter. Students would go to school on Tuesday but would be attending their Monday classes.

Although there has been strong support for this option, Freberg insisted that the committee must look at all the possible ramifications off these options.

"We must appreciate the issues that not only face the faculty, staff and administration, but also the students," Freberg said. "Disruption of child-care and work schedules should be held to a minimum. It's important to understand the demands that students have for their time."

Fee hike threatens diversity at Poly?

By Torea Galiardi
Daily Staff Writer

The time remaining before affirmative action is eliminated on University of California campuses is dissipating rapidly, leaving many at Cal Poly wondering what will happen to admissions with the raise in tuition and the enactment of the Cal Poly Plan.

Cal Poly, part of the California State University system, will not be participating in the elimination of affirmative action.

However, under pressure from the California government, Cal Poly has to move toward 16,000 students to obtain full capacity in the near future. With this barrage of new students, affirmative action is a key issue, along with the ever-present need for financial aid.

A few years ago, state funding was reduced, forcing Cal Poly to decrease enrollment in order to offer the same programs to students. However, according to the state, the top one-third of

graduating students can go to CSUs, said Academic Senate Chair Harvey Greenwald.

This led to the creation of the Cal Poly Plan to increase the enrollment, fees and programs at Cal Poly.

The Poly Plan Steering Committee approved a proposal last week to raise students' fees by \$120 per year. The CSU Board of Trustees must now vote on the proposal.

"There is a concern that if fees are raised ... what will that do to diversity and what will that do to students in general that don't have the resources?" Greenwald said.

According to Linda Dalton, interim associate vice-president of Academic Affairs, the issue of financial aid and diversity are directly related.

"Some people from under-represented groups are also people who have limited financial means," Dalton said. "It does tend to be people from minority

groups that have been disproportionately people who also have financial needs. Certainly financial aid programs are important to maintaining diversity."

Although there is a direct correlation between diversity and financial aid, affirmative action has not often been the center of Cal Poly Plan discussions.

"I think that (affirmative action) is not the center of the plan because we're focusing on a lot of other things that are being intensely debated," Academic Senate Vice-Chair John Hampsey said.

"Financial aid has been a big issue that has always been at the center," he said. "If we are going to raise money, we have to keep in mind financial aid."

Dalton said she thinks there will not be a big change in diversity in enrollment.

"I think there are enough people out there with interest in Cal Poly that some changes in

23 days left in Winter quarter

TODAY'S WEATHER: clearer skies**TOMORROW'S WEATHER:** increasing temperatures

Today's high/low: 60s/ 40s Tomorrow's high/low: 70s/ 50s

Dr. Steven Marx will be leading informational hikes to Poly Canyon to look at the ancient oak groves and other natural areas that would be destroyed by the state water pipeline. Hikes will take place every Fri. at 4 p.m. and every Sat. at 11 a.m. Meet in the staff parking lot across from Perimeter Road.

Today

The **Julian McPhee Art Galerie** is currently featuring the work of three talented artists. The exhibit will be three distinctive experiences and world views as seen through the painting and pastels of these powerful artists.

Upcoming

Minorities in Agriculture Natural Resources and Related Sciences is having its first meeting Feb. 7 at 6 p.m. in building 10, room 222. For more information, call Juan Gomez at 781-9763 or Carolyn Jones at 756-2577.

The **Women's Studies Potluck** is taking place Feb. 8 at 6 p.m. at Dr. Shawn Burn's house. For directions and information, call 756-1525.

Physics Colloquium is having a discussion titled, "Heavy Electron Superconductors" Feb. 8 at 11:10 a.m. in 52 E-45.

Philosophy at Poly Speakers Series is having a discussion called "The Tapestry of the Moderns: The Modern Art of India and Global Cultural Identity" on Feb. 9 at 3 p.m. in UU 220.

Agenda Items: c/o Natasha Collins, Graphic Arts 226, Cal Poly 93407 — Phone: 756-1796 Fax: 756-6784

Please submit information at least three days prior to the event
Due to the excessive demand, not all items submitted to the Agenda section will be printed. Agenda information will be printed exactly as it is received (i.e. spelling, times and dates).

Student directories now available

By Jeff Deach
Daily Staff Writer

When was the last time you were looking to call a study partner and realized you didn't have the phone number? Look no further — Cal Poly's 1996 Associated Students Incorporated directories are out.

According to Creighton Oyler, ASI student directory editor, copies are now available at the ASI executive office and the information booth both in the University Union and in most of the dormitories on campus.

"They are free to all students," Oyler said. "(The students) just have to present a current (Cal Poly) ID at the time of pickup to receive their free directory."

Oyler said ASI profits from providing students with directories.

According to Duane Banderob, ASI executive vice president, the publisher pays \$7000 to ASI for the rights to publish the directories. The money goes into the ASI executive officers account, which covers office expenses.

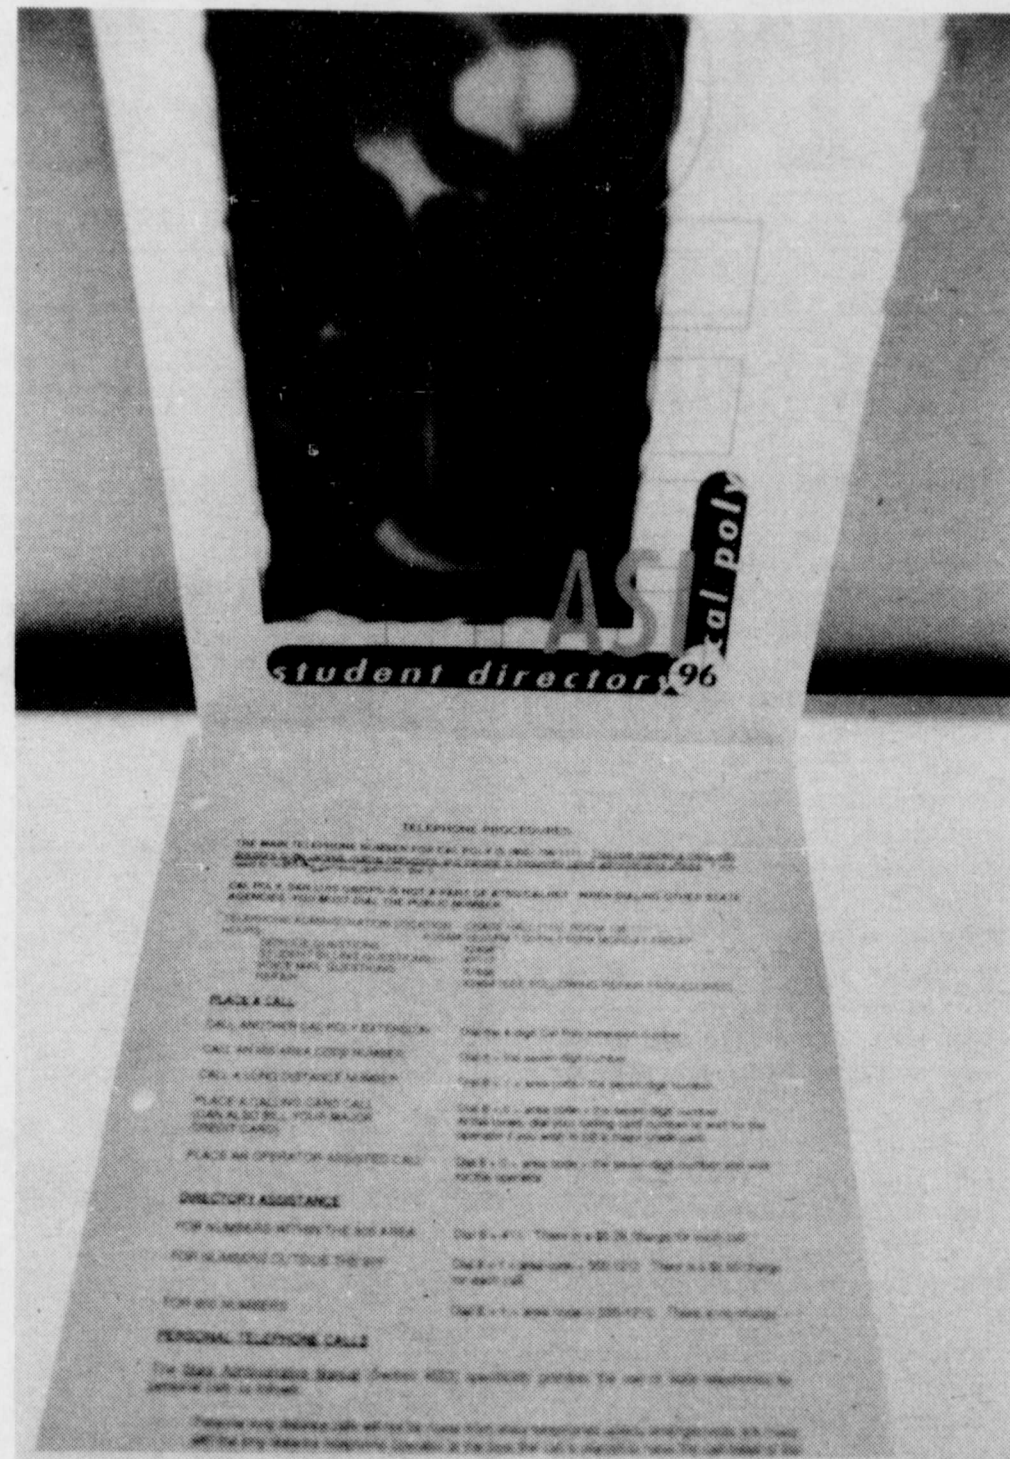

The publisher makes its money by selling advertising space in the directory.

Oyler said ASI was in charge of putting together the first 40 pages, which consists of such things as: Student Life and Activities; University Student Services; and Clubs and Organizations. Student listings are provided by the records office.

The material for the book was sent to the publisher in late December after ASI received the final address and telephone listings.

Once the publisher sold the advertisements for the book, they were published and sent back to the university.

"The university received the directories from the publisher in mid January," Oyler said.

The new ASI student directories have arrived. They will be available, for free, at the ASI executive office, the information booth in the University Union and in most resident halls on campus / Daily photo by Joe Johnston

Most other CSU campuses do not publish student telephone directories, however two that do, CSU Fresno and CSU Chico, distribute theirs much earlier than Cal Poly. Fresno's directory comes out in October while Chico's is released in early November.

Friedman said students do

have a choice of whether they want information to be released and published in the directories.

"Students can specify on their Student Schedule Fees form (SSF) if they want their information to remain private," Friedman said. "Only about 235 students did not want their information released this year."

TAKE YOUR BEST SHOT.

VALENTINES DAY SHOOT

Sponsored by Cal Poly ROTC

When: February 8, 1996, 9:00 am to 5:00 pm.
Where: Campus Indoor Range (next to the Aviation Hangar, near the Horse Track).
Prizes: Boxes of candy will be awarded hourly to the top shooter and roses to the top shooter of the day.
How Much: Five shots for \$1.50, rifles and ammunition provided.
Shuttle: Will leave from the Dexter Building every hour, 15 minutes after the hour.
Info: Call 756-7682, ask for Captain Page.

VOTES: Polls open half-hour earlier in Iowa, La.

From page 1

His supporters ran an aggressive phone-bank operation urging Republicans to turn out.

Buchanan spent the entire day in the state, capping a spirited effort in which he campaigned often and invested in television advertising. He made no predictions but said, "Any delegate we get away from Phil Gramm is a victory."

Buchanan hoped to deny Gramm's bid for momentum heading into Iowa and New Hampshire, where they are competing for many of the same conservative voters.

Although the event was dubbed a caucus, it amounted to a mini-primary.

The state GOP set up 42 voting sites around the state and polls were open from 4 p.m. to 8 p.m. local time. In one last tweak at Iowa Republicans, who tried unsuccessfully to derail the Louisiana event, polls opened a half-hour earlier in tiny Iowa, La.

"I think Buchanan represents change," said businessman Cecil Heflin, who voted in Iowa, where about 40 people turned up to vote in the first hour. "We don't need any more dinosaurs like Dole or Gramm who have been in Washington forever."

Will LaBauve, who voted in Lafayette, where lines were longer, said he was voting for Gramm delegates because the Texan was "the better candidate in that he is more likely to win." Retired state worker Cecile Butcher voted for Gramm delegates, too, but only because Forbes wasn't participating.

Using secret ballots, not a traditional caucus setting, voters

were electing three delegates and three alternates from each of the state's seven congressional districts.

Nine more national convention delegates will be allocated based on the March 12 "Super Tuesday" primary, when others plan to be on the ballot. It takes nearly 1,000 delegates to clinch the nomination.

Gramm began his campaign a year ago with a victory in a Louisiana GOP straw poll, but has struggled since. He had hoped for a psychological boost from a non-binding straw poll last week in Alaska, but placed a distant fifth.

So he was counting on a sorely needed victory — and the early lead in the delegate hunt. The state's three Republican House members backed Gramm, as did most of the party hierarchy. He also had the support of the state Christian Coalition leader.

Buchanan, too, had his share of support among Christian and other conservative activists. He tried to increase it by promising to outlaw abortion, eliminate affirmative action, crack down on illegal immigration and give communities more power to reject gambling.

Buchanan relished the chance to go head-to-head against Gramm, repeatedly suggesting Gramm's record wasn't as conservative as the Texas senator would suggest. One Buchanan ad said Gramm had voted for five tax increases; another criticized his support for free-trade deals that Buchanan blames for lost American jobs.

Police arrest father after fire kills seven family members

By Jeff Wong
Associated Press

GLENDALE, Calif. — A smoky arson fire in an apartment killed seven members of a family early Tuesday and police later arrested the father, who reportedly fled the scene with burns on his hands and forehead.

Jorjik "George" Avanesian, who was arrested several months ago in a child abuse probe, called police 6½ hours after the blaze from a newspaper office in the San Fernando Valley, said police Sgt. Chahe Keuroghelian.

"He informed them he was involved in the arson murder incident," Keuroghelian said.

Avanesian, 40, was arrested at the Asre Emrooz Persian Daily News returned to Glendale. He was booked for investigation of arson and murder, said Sgt. Rick Young. Police would not speculate on a motive.

The victims were members of an Armenian family who arrived from Iran last fall and spoke little English, neighbors and police said. Four children and three adults, ages 6 to 60, were killed. Their names were not released.

The family moved into the East Harvard Street apartment Oct. 1. On Nov. 4, Avanesian was arrested for an Oct. 27 incident in which he allegedly threw a chair at his children, Young said. He was not charged, but was counseled and warned he would face charges if it happened again.

Evidence of a flammable substance was found in the living

"It's unusual that the fire would reach that intensity without anyone knowing or without anyone being able to get out."

David Starr
Battalion Chief

room and kitchen of the first-floor, one-bedroom unit, police said. The fire apparently spread quickly when it broke out about 5:45 a.m.

"There's no doubt that those people were trying to find every last bit of air," said fire Battalion Chief Joel Markss. "The only way out of there would have been to jump out the window."

Smoke seeped through the 42-unit building but flames were confined to the one unit, blackening the windows. The building is outfitted with smoke detectors, fire officials said.

"This is a very unusual fire," said Battalion Chief David Starr. "It's unusual that the fire would reach that intensity without anyone knowing or without anyone being able to get out."

It appeared that four victims crowded into a bathroom to escape smoke, said City Councilman Larry Zarian, who toured the apartment.

"I saw two youngsters on top of each other for safety," Zarian said. "There were four inside a bathroom and I chose not to go inside. Their bodies were not charred."

A seventh victim was pronounced dead at a hospital, fire officials said.

Neighbors awakened by the fire fled as smoke filled the building.

"I just heard a noise and woke up. I heard a woman yelling," said neighbor Vahe Dishajdzian, who also lives on the first floor.

"There was smoke first and then first thing we heard was the alarm," said Mary Kissablak, who lives on the second floor. "We couldn't see anything. We went downstairs and we couldn't see our hands in front of our faces."

Asre Emrooz Persian Daily News publisher Homayoun Houshiarnejad said Avanesian called before showing up at the newspaper.

"He said, maybe could he come by and talk. I said, why not," the publisher said. He declined to reveal what Avanesian talked about.

Avanesian had fled from the fire scene to a sister's nearby home and then left, police Sgt. Jon Perkins said. The sister called police after he left.

Get Obsessed!

At Aspect Telecommunications, we describe ourselves as obsessed. Even a bit fanatical. Our customers agree. They know we'll go the distance for them. They consistently tell us that our world class business solutions for mission-critical call centers make an enormous difference in achieving their goals for growth and profitability. But as much as our push-the-envelope technology pleases them, it's our unswerving dedication to their needs that makes us the market leader. Aspect creates the industry's premier total call management solutions. No wonder we're the Bay Area's second fastest earnings growth company, according to the San Francisco Chronicle. And one of America's best-loved workplaces.

Opportunities exist for all Engineering and Business majors.

COLUMN

Demonizing the past;
praising the present

by Kurt Horner

Long hours. Child labor. Starvation wages. All known elements of the Industrial Revolution, especially in England. This bleak period in history has often been used as an example of laissez-faire capitalism — of what happens when a market economy is left to its own devices.

But that's not the real story.

In England, toward the end of the 18th century, advances in farm technology made it possible to grow crops with far less farmers. The feudal practice of tenant farming began to fall apart, and thousands of farmers were kicked off their land to live in the cities. The newly created factories were their only recourse. They had to choose between work and starvation.

Note the origin of this large mass of laborers. Land was monopolized by the state; only aristocrats were allowed to own land. Thus, the landed aristocracy herded laborers right into the hands of other aristocrats — the city-based industrialists. The government land monopoly took agriculture out of the competition for laborers, giving the industrialists de facto control of the entire labor market. The entire process of industrialization was corrupted by the influence of government.

In America, industrialization took hold at a slower pace. Our vast frontier prevented the land monopoly that existed in England. Even when, by the mid-1800s, our industrial output exceeded that of Britain, the regulation of factory work was largely a non-issue. In England regulation began before 1820.

That's not to say conditions were wonderful in American factories. Horrible working conditions existed in America as well, but for different reasons. It was the tariff that created business indiscretions in America. But cushioning businessmen from competition, the high tariffs, especially in the Civil War period, made possible the worst of abuses by capitalists.

The policy of land-grants created problems as well. The railroad companies of this period often got started, not to build rail lines, but to speculate on frontier land. Congress gave away huge strips of land to railroad companies to give them the "incentive" to build transcontinental railroads. Some incentive it was too! Many of these "railroad" companies made far more money selling the land adjacent to their rail lines than they ever did hauling freight.

All through the period of so-called laissez-faire economic policy, the hand of the state was present. In the post-Civil War era, the U.S. government began a number of institutions that cannot by any stretch of the imagination be considered "hands-off." Railway, road-building and shipping subsidies were handed out. The Commerce Department and Interstate Commerce Commission were formed. Most of all, Congress passed the Antitrust Acts. Far from preventing monopoly, the Antitrust Acts helped maintain monopolies by giving large businesses the ability to accuse smaller competitors of "undercutting" them (i.e. providing better service at a better price).

In his recent State of the Union address, President Clinton said, "We must not go back to the time when Americans were left to fend for themselves." Like so many politicians, left and right, the President truly believes that an era of government noninterference existed in this country. The robber barons of the 19th century did compete with one another, but not for customers, as they would in a truly laissez-faire society. They competed for government privilege.

Kurt Horner is an architectural engineering freshman.

It has been brought to our attention that we, the Opinion editor, may have led some alert readers astray in our policy box yesterday. No goldfishes or ferns, as far as I know, have ever been harmed by a member of our administration. One large potted plant was knocked over on Superbowl night at Mustang Village by some overenthusiastic Cowboy fans, but they looked much too young to be members of the administration. And we know Muffin, our mom's cat and the last creature to bring about the untimely demise of a family goldfish, does not work for the state. So, sorry if I led you astray. But you should really know better than to take me seriously by this point.—D.P.

COMMENTARY

Scientific leeches

by Jon Paul Mahaffy

I'm glad that the Mustang Daily printed an outside opinion piece last Tuesday, written by Neal Lane, director of the National Science Foundation (NSF). It exposed the tactics used by government officials to control our money.

By working for the NSF, Neal Lane chose to play the government's game of give and take in which the government takes from its citizens and gives to eager recipients. The NSF is in threat of being dropped from the government's payroll and is thus losing the game. Lane's speech shows the cries of a leech as it's plucked away from its victim. In free democratic governments, the bureaucrats have no power to leech without the consent of the victims, or without popular vote; so their tactic is to propagandize and manipulate people to beg for them. Imagine that: allowing a leech to talk you into sticking it on your body.

If I wanted to know the percentage of drivers who deliberately run over a rubber snake placed in the road, I'd help fund the project. But I wouldn't reach my hand into my neighbor's pocket claiming it was for the public good. If I had an interest in knowing the depth of the Arctic icecaps but would rather have knee surgery, I'd have that freedom.

Lane displays his knack for this type of manipulation. He talks of the damage the government shutdown did to his department and how his staff is "trying...to make sure the science is not damaged by the disruptions." Also, he worries about future spending cuts to government science and claims that "we are not operating in a healthy environment for science." He ties the very wealth and success of this country to "federal investment in R&D," and warns that America will likely fall behind if science is not funded.

Finally, he skillfully tosses in his trump card by appealing to the authority of scientists to know what is best for this country: "(a scientist) understands better than anyone the price our nation will pay if we fall behind in science and technology in the effort to downsize government."

It may seem beneficial that the government gives grants for research, but it is not. It's a ruthless violation of the individual rights of every citizen in this country. Government does not create wealth. The government takes your earned wealth and gives it to anyone who

claims to be working for the public good. Occasionally, benefits do come from government-funded science, but this speculation should come from only those individuals who choose to invest.

Science would not be damaged if the government were not involved, as Lane wants us to believe. Instead of bureaucrats deciding who gets funded, individuals would. If I wanted to know the percentage of drivers who deliberately run over a rubber snake placed in the road, I'd help fund the project — but I wouldn't reach my hand in my neighbor's pocket claiming that it was for the public good. If I had an interest in knowing the depth of the Antarctic icecaps but would rather have knee surgery, I'd have that freedom. Why pay for something you have no interest in?

Likewise, the success of this country would not be damaged if the government did not fund science and technology. The 19th century should prove that. This country rose from near poverty on the backs of individuals who wanted a better life for themselves knowing that they were solely responsible for making that happen. Today, we have loafers who'd rather not live their own lives, but rather rely on government to make their decisions for them; or others who'd rather not consider scientific interest, but rather rely on government to choose what science research is in their best interests.

Public good is constantly injected into society as the moral ideal, as though the problems of this country (or the world) would be erased if everyone acted for the public good. The very nature of humanity makes this impossible and destructive. We are not a piece of the societal whole; we are individuals, and each individual must be solely responsible for living his or her own life.

Who else can live your life and make the decisions about what is best for your survival and happiness but you? We're not stupid slaves.

Neal Lane knows which buttons to push to keep our money flowing into his department. He recognizes that the science community's "perceived lack of concern has not gone unnoticed in Washington," and claims that "(it's) time to speak out." He recognizes that if he yells loud enough, he can dip his ladle into the government's big pot of confiscated (and borrowed) money. (The same goes for any special interest group these days.)

Lane claims that science in this country is under attack. It's not science that is being attacked — it's government stealing which is being recognized — and as a leech, Neal Lane cannot let that happen.

Jon Paul Mahaffy is an electronic engineering junior.

LOOKING TO THE FUTURE

Former Cal Poly baseball player and future Hall of Famer Ozzie Smith donated \$1 million in support of the athletic department's bid for a new baseball complex.

Showtime

BY MICHAEL WILBON
THE WASHINGTON POST

Bless their hearts for coming back. You can say Michael and Magic are addicted to professional basketball and all that accompanies it, and you would be correct. But as much as they needed the NBA, basketball needed them even more. Desperately so. Bless their hearts for coming back to show a spoiled, overrated, egomaniacal generation of little brats what true greatness really is.

You know the Bulls and the Lakers are going to meet in the NBA Finals, don't you? And when it happens, I don't want to hear about it being "fixed" or how there's a "conspiracy" between the league and the TV networks.

Andrew Bernstein NBA / Allsport

The only conspiracy will be one of hard work, of extra practice and dedication, of gamesmanship, of loving something so dearly you work to be better at it than anybody, past or present. Did you see Magic hit those left-handed hooks in his return against Golden State? Left-handed hooks. Magic didn't have that in 1991. He's added more to his game in retirement than some Generation Xers have in the prime of their careers.

It's up to Michael and Magic

(and Charles Barkley) to stick around long enough to teach a whole slew of 20-something kids that having commercials and millions of dollars doesn't mean you're a great basketball player. The two conditions can be, and too often are, mutually exclusive.

When the issue arises of why the league is so bad, most people give the easy answer: expansion.

That's not it, not really. Sure, the talent pool is thinned now that there are 29 teams, but that's not the biggest problem. Michael Jordan said, "The guys, the young guys, don't know how to play now. They don't even know how to practice."

Jordan went on to point out how he can take advantage of today's young stars in part because they can't counter certain basic plays he had mastered by the time he was 26. People got all over Jordan's case for saying a year ago that the youngsters lacked professionalism. It was the truth then, and it's the truth now.

The league is less than it should be now because today's stars frequently aren't even fundamentally sound, much less great basketball players.

A coach suggests they work on something, the kid cops an attitude. Practices get interrupted by beepers and cell phones and agents who need a signature. That's why Magic couldn't coach these clowns. Sensitive to the criticism, Jordan didn't name names, but I will. A partial list has to include some of the biggest names like Derrick Coleman, Kenny Anderson, Latrell Sprewell, Shawn Kemp, Gary Payton, Vernon Maxwell, Isaiah Rider, Jamal Mashburn and Todd Day. Shawn Bradley didn't get traded because it appears he doesn't have the potential; the word is he won't pay the price to be great, like Rik Smits did.

So many of the players drafted in the lottery the last five

years are much, much less than they should be. That's why the exceptions, like Shaq and Penny Hardaway and Juwan Howard stand in such stark contrast.

There was a great cry of opposition when so many of the old-school guys like Karl Malone and John Stockton, now in their mid-30s, were put on the U.S. Olympic basketball team again, instead of the bright young talents. It was a good message to send to the kiddie corps: you're loud and, even worse, you're not that good.

COMMENTARY

What many of the the young punks missed when they entered the league was a long apprenticeship. Larry Bird would have played a couple of more years but his back wouldn't let him. Magic contracted the HIV virus. And Jordan, for so many reasons, retired after only nine seasons.

All at once, or close to it, the league lost its masters, the men who would teach the youngsters how to play, how to comport themselves, what steps are necessary to go from talent to greatness. Without that trinity, the youngsters ran amok. They embarrassed themselves and the league in Toronto during the World Championships, and the level of professionalism we'd become accustomed to in NBA players slipped noticeably. One of the reasons Barkley has talked so much about retirement has nothing to do with his ailments.

"Some of these young guys don't have the respect for the game they should have," he told me. "The game should be sacred."

With Jordan back in his full glory and Magic back for at least the rest of this season, the bet here is there'll be a lot less strutting from some of the youngsters who will find it pret-

ty embarrassing to be taken to the cleaners by guys fast approaching 40.

Sprewell and Joe Smith are still trying to figure out that ballfake that Magic put on them Tuesday night in The Forum. Friday's game between the Bulls and Lakers should be required viewing for anybody under 30 who thinks he's a great player. High-school coaches should cancel practice that day and bring the players back to the gym for a screening.

That Magic could miss more than four years and come back the very first night and nearly record a triple-double is absolutely a testament to his greatness, but also evidence of what is lacking in men 10 years younger than he is. Magic and Jordan aren't what they were when they met in the NBA Finals five years ago, but they're still better than everybody else.

Magic, who didn't have much speed to begin with, is downright lumbering now. But one can sense a new economy in his game, all the better to comprehend the range of his court brilliance. In the first of Tuesday night's NBA doubleheader, Jordan had a horrendous shooting night (27 percent), but when the game was on the line, he nailed a three-pointer and

swished a hook over Hakeem Olajuwon.

"These young guys don't realize how much of the game is played in your head," Jordan said. "There are a million ways to mentally compensate when one of your physical skills starts to diminish."

Jordan, about to turn 33, knows that. Magic, headed toward 37, knows that. Asking them to teach those lessons to an entire generation of young players may be too much, but those of us who love the game are desperately hoping they can.

Perhaps you've seen the Nike commercial with Jason Kidd, Jimmy Jackson, Kevin Garnett, Eddie Jones and Joe Smith, the one that says, "The revolution will not be televised" (though it will be commercialized). There isn't as much as a single Final Four appearance among them. Instead of leading a basketball revolution, they ought to be trying to find their way to a TV set Friday night, even the wondrous Kidd whose triple doubles don't keep the Mavericks from losing night after night. They should then sit down, shut up and turn to the Bulls-Lakers game and find out what a basketball revolution is. The Old School has reclaimed its prominence just in time.

A game of buzzer beaters

BY ROBBIE PICKERAL
SPECIAL TO THE SPORTING JOURNAL

Credit the buzzer beater.
Credit Lady Luck.

Or just blame it, as many do,
on simple parity.

Saturday's game featuring North Carolina and Georgia Tech at the Dean Smith Center features more ramifications than anyone expected at the beginning of this college basketball season.

Despite losses over the weekend -- North Carolina lost to North Carolina State, 78-75, while Georgia Tech fell to Maryland 88-74 -- both schools sit atop the Atlantic Coast Conference Standings with Wake Forest at the halfway point.

No way the Tar Heels (16-5, 7-2 in the ACC) are supposed to be ranked eighth in the nation. After all, they lost two All-American prospects in Jerry Stackhouse and Rasheed Wallace, and they return only two starters from last year's Final Four squad. No way the Tar Heels should be the top team in the league. After all, they start two freshman.

Think again.

On the flip side, the Yellow Jackets (13-10, 6-3) aren't supposed to be only game back of first place in the conference. Sure, they boast a supershooter in senior guard Drew Barry and a stellar blue chip freshman in Stephon Marbury, but Georgia Tech isn't supposed to be talented enough to make a run for the ACC title. Those plaudits were

supposed to be left for Wake Forest. Or Maryland. Or Virginia.

When North Carolina and Georgia Tech rumbled at the Omni in early January, it marked North Carolina's first -- and only -- league loss, and allowed Georgia Tech to claim a spot atop the ACC standings. The teams have since swapped places. The Yellow Jackets lost their next game to Wake Forest and the Tar Heels eked out wins in their next five conference

GAME OF THE WEEK

Georgia Tech
at No. 11 North Carolina
Saturday

Atlantic Coast Conference standings

TEAM	Conference		Overall	
	W	L	W	L
North Carolina	7	2	16	5
Wake Forest	6	2	14	3
Georgia Tech	6	3	13	10
Maryland	4	4	11	7
Clemson	4	5	13	5
Duke	4	5	13	8
North Carolina St.	3	6	13	8
Virginia	3	6	8	10
Florida State	2	6	10	8

games. But Saturday's game could determine yet another swappage.

And it looks to be a war.

Georgia Tech garnered the edge in teams' first matchup with two seconds remaining when Barry, a third-team All-American in the preseason, grabbed his own rebound of a 1-and-1 attempt, which allowed the 84 percent foul shooter to return to the charity stripe to ice the game 80-77.

"It's still early in the season, so its really good practice for us to be playing close games like this," North Carolina freshman Antawn Jamison said after North Carolina's loss.

True, but that 'good practice' has turned into the norm for the Tar Heels. The loss in Atlanta is North Carolina's only blemish in games which have come down to the wire.

Against Maryland, Jamison hit a sub-second buzzer beater to escape from College Park with a win. Against Wake Forest, North Carolina battled back from an 18-point deficit to take sole possession of the conference lead. And against nemesis Duke on Jan. 31, senior Dante Calabria put back an offensive rebound to cap a 12-point rally in another thriller at the Smith Center.

Georgia Tech boasts exciting talent in the senior-freshman backcourt of Barry and Marbury. Barry, the only Georgia Tech senior, is a solid fixture at shooting guard, and should post a tough defensive battle with Calabria, as both are dangerous from behind the three-point line.

Marbury, who leads the team with 19 points per game, and McInnis will battle at point guard. Look for a combination of North Carolina's freshmen to attempt to shut down Georgia Tech junior Matt Harping, who outrebounded the Tar Heels in their last matchup.

Robbi Pickeral is the Sports Editor for The Daily Tar Heel.

Blue chip freshman: Georgia Tech freshman Stephon Marbury and the Yellow Jackets will look to upset North Carolina once again.

Dominance missing in ACC

BY IVAN MAISEL
NEWSDAY

The preferred adjective for the Atlantic Coast Conference this season is "balanced." True enough, the Sagarin Ratings have the ACC first among the Division I leagues, scarcely ahead of the Big East. That is only math, a result of the introduction of Notre Dame, Rutgers and West Virginia into a league for which they are ill-prepared.

Put the tradition aside. Not even Tobacco Road can survive the ravages of the NBA draft. One season after underclassmen Joe Smith, Jerry Stackhouse and Rasheed Wallace left the ACC to become three of the first four draftees, the league is groping for a leader.

The competition within the conference remains spirited, of course, thanks to decades of ingrained hate. When Duke entered the Dean Smith Center last night, rest assured the fans of North Carolina (15-4, 6-1), the ACC leader before the game, reveled in the mediocrity of the Blue Devils (12-7, 3-4). But forays outside the conference have shredded any argument that the ACC and its teams should be ranked at the top.

On Jan. 20, North Carolina suffered its worst non-conference defeat in six seasons, 76-56, to Villanova. Last Sunday, at the Hartford Civic Center, Virginia set ACC basketball back decades. UConn, with a 17-0 run midway through the first half, raced to a 39-18 halftime lead and won, 76-46. Between those games, Duke suffered yet another second-half lapse and lost to Temple, 59-58.

Virginia (7-9, 2-5) has lost four straight with increasing alarm. Clemson (13-4, 4-4) started 11-0

but injuries, particularly to guard Merl Code, have left the Tigers a shell. Rick Barnes is starting four freshmen, a first for Clemson since the World War II years. Starting guard Bill Harder, who missed four straight games because of a knee strain, came off the bench for four points Tuesday in the Tigers' 73-70 upset of Georgia Tech (13-9, 6-2).

Smith will have North Carolina ready come March. The Tar Heels have veteran guards (senior Dante Calabria and junior Jeff McInnis), a must for NCAA Tournament success. Georgia Tech, despite falling out of a share of first place, is tak-

ing on the look of Bobby Cremins' two best teams: great guards and a short bench. Freshman Stephon Marbury is quickly adjusting to the college game, and vice versa. Florida State (10-7, 2-5) held Marbury to 12 points Saturday by assigning a man to him and playing a 1-3 zone on the rest.

news & notes

Wake Forest (14-3, 6-2) still looks like a music video: one star (Tim Duncan) and an anonymous supporting cast. Duke bounced back from the Temple loss to win at Maryland (9-7, 2-4). "This is a bridge team," Duke coach Mike Krzyzewski said. The question is whether the bridge will be finished by March.

As point guard Kiwane Garri goes, so goes Illinois. "You can say one player shouldn't make

such a big difference, but he does," Illini Coach Lou Henson said after the 6-foot-2, 182-pound junior returned last week from two injuries to save the Illini's season.

The 11-1 start, with four victories over Top 25 teams, may have been a sum greater than Illinois' parts. When Garri missed most or all of Illinois' first five Big Ten games because of an abdominal strain and a shoulder injury, the Illini went 0-5, their worst league start in 65 years. "We've been losing games," Garri said, "because we didn't have a go-to guy."

In his first game back, Illinois upset Purdue, 71-67. Garri scored four points in the final minute. That's a go-to guy. Illinois followed with victories over Ohio State (77-46) and Northwestern (74-62), which amounts to little more than bottom-feeding. The Illini (14-6, 3-5) received a needed boost, on the court and in their own heads.

Utah Coach Rick Majerus isn't the only one who left his team to go see recuperating UTEP legend Don Haskins. Iowa State's Tim Floyd, a former Haskins' assistant, coached his Cyclones at Colorado last week, took a 5:40 a.m. flight out of Denver to El Paso, spent the day with Haskins, flew home to Ames -- and conducted a 10 p.m. practice ... Pac-10 leader UCLA (13-6, 6-1) lost a shocker, 78-75, to a depleted Louisville team Saturday on a last-second, three-point shot. The Bruins had been eight points down late and fought back to take a lead. But Bruins assistant coach Lorenzo Romar said the team knew better than to be deflated by the buzzer-beater.

OZZYSOME!

The plans for new athletic facilities are out, and the excitement is following.

BY MARK ARMSTRONG

Cal Poly President Warren Baker called it yet another example of a "paahtnaship" between the university, the alumni and the community.

That's "partnership" for those who have trouble translating Bostonian.

No matter how it is said, the bold new future for Cal Poly athletics was unveiled Jan. 30 in the presence of baseball messiah and Cal Poly alum, Ozzie Smith. The project will once again reunite the collaborative forces that also brought Cal Poly the Performing Arts Center.

"There's nothing we can't achieve as a community together with the university," Baker told the overflow audience at Cal Poly's Alumni House.

Capital Campaign fund-raising committee Co-Chair Robin Baggett followed Baker's remarks by indirectly adding that nothing will be achieved without money.

The estimated \$19.5 million stadium and recreational facilities project includes plans for baseball and softball complexes, a football stadium and Mott Gym renovation. The project also calls for seven new fields for community and student use.

"Having a stadium on campus was absolutely crucial to the program," said Cal Poly baseball coach Ritch Price. "It's a great day for Cal Poly baseball."

Though baseball was the main focus, Athletic Director John McCutcheon wanted to leave no area untouched in the plans.

"We wanted to take a very comprehensive approach to it," said McCutcheon, not wanting to limit fund-raising to just one complex.

So far, the plan for the baseball complex and recreational fields is leading the charge thanks to Ozzie Smith's \$1 million commitment to the campaign.

Ozzie Smith Stadium, as it is now to be called, looks like it will be the first to break ground.

When that will be depends on when the rest of the money appears.

McCutcheon said the money will need to be secured before anything goes ahead.

So far, the campaign has raised nearly \$1.7 million for the baseball complex and recreational fields. Other donations came from members of the Capital Campaign group, and organizations with ties to Cal Poly athletics, such as the Sence Foundation of Visalia, which donated \$10,000.

All of those involved with the project credit its quick start with Smith's involvement in the campaign.

"Ozzie's commitment gives the whole project instant credibility," McCutcheon said.

Smith's name gives not only credibility to the stadium, but it also gives plenty of other opportunities for donations from the people of St. Louis. After spending 14 years with the St. Louis Cardinals, Sleeper believes the St. Louis community will jump at the chance to give something back.

"He is so well thought of in St. Louis," Sleeper said. "I think we'd be missing an opportunity if we didn't try to rally support for the stadium in that community as well."

Smith would like to return to Cal Poly to support the baseball program, but has no plans of making San Luis Obispo his permanent home after retirement.

"His roots are very deep in St. Louis," Price said.

Capital Campaign has also enlisted the help of San Diego Chargers General Manager and former Cal Poly football player Bobby Beathard to help get the project going. Although it has not been confirmed, Sleeper said Beathard agreed to contribute \$100,000 over five years to go towards the football stadium.

One significant name is missing from the Capital Campaign co-chair lineup.

John Madden, the Fox Television football analyst whose name is splattered all over Sega video games and Ace Hardware commercials, received both his undergraduate and graduate degrees from Cal Poly.

Madden supported Cal Poly athletics for a long period. His biggest fund-raiser was an annual golf tournament, which he put on for 11 years on the Central Coast. He terminated the tournament three years ago.

Both Sleeper and McCutcheon admitted that Madden may have become discouraged by the lack of direction in the then Division-II program thus ending his participation with Cal Poly athletics.

Sleeper doesn't blame Madden for his feelings, and hopes the stadium plans could be a wake-up call for hesitant alumni such as Madden.

Right now, however, Sleeper said the committee is not actively seeking support for the football stadium and Mott Gym renovation.

"It seems ludicrous to move on a football stadium (without Madden)," Sleeper said.

"He's saying 'show me progress, and I'll get involved.' He's basically calling the bluff."

McCutcheon cringes when people start asking if the football stadium will soon be named John Madden Stadium.

"It works against us, because when John sees those kind of things,"

McCutcheon said, "he feels like he's being pushed."

To see the fruits of another "partnership" between community and university, take a quick walk across campus from what is now just a stadium mirage to the Performing Arts Center.

Cal Poly unveiled the architectural renderings of the Performing Arts Center on Nov. 12, 1990, and theatre and music enthusiasts drooled as officials detailed every aspect of the project then scheduled for completion in 1992, with an estimated \$23 million price tag.

It's now 1996, and the approximately \$28 million project is finally nearing completion.

The Center has hit snags along the way, including a major problem with contracting bids. The contractors' bids for construction of the complex were close to \$4 million over the original estimate, according to Music Department Head Clifton Swanson.

"We were very surprised at how high it was," Swanson said about the contracting bids.

Baggett said that contracting arrangements for the stadiums will not be made until funding for the first-phase estimates are taken care of.

The Performing Arts Center is still trying to raise money as the finishing touches are being put on, but received support from the city and state. The city hopes to give generously to the stadium, but the state won't be paying a dime.

The city of San Luis Obispo made a \$4.5 million contribution to the Performing Arts Center and the state gave \$15 million.

Swanson said the state was allowed to give money to the project because a classroom was included in the facility plans.

Swanson, now an experienced veteran when it comes to big undertakings, was surprised that the stadium committee had not thought of the idea to throw in instructional facilities to score funding from the state. He believes, however, that Capital Campaign will have no trouble at all finding \$19.5 million for the facilities. "Money flows for athletics," Swanson said.

Money also apparently flows from athletics.

Proof of that is from the largest private donor to the Performing Arts Center project.

Chris Cohan, owner of the NBA's Golden State Warriors and president of Sonic Cable, contributed \$2.1 million to the project.

There has been no indication that Cohan has been approached for the \$4 million Mott Gym renovation project.

The Golden State Warriors practiced in Mott Gym last fall for training camp.

Swanson believes, in time, the community support will generate more than enough money for all of the stadium projects.

"All through the years we've heard there's only so much money," Swanson said. "If you're successful, the money comes."

Sleeper said the approach on this project won't allow them to bite off more than they can chew.

The sports complex project will take more of a "baby-steps" approach, in that all of the money for all phases won't be needed at once.

This will allow the Capital Campaign to focus on fund-raising one phase at a time.

The baseball complex and recreational field phase will cost \$7.5 million, and Baggett envisions the goal being accomplished quickly, with the help of the city.

"We're going to be pretty well home," Baggett said about the project once the city throws its spare change in the basket.

Mayor Allen Settle is optimistic about the project which will fill the city's growing need for more recreational space.

"It's very ambitious, but that was also true of the Performing Arts Center," Settle said.

The support that the city will give, Settle said, will depend mostly on what comes out of joint-use agreements for the recreational fields.

The committee has found no enemies in its project plans so far, not even from the agriculture department.

The department originally raised opposition with the stadium's first proposed site because it was right on top of prime agricultural land.

What the future holds...

HEERY

A new look: The first project to break ground will be the new baseball/softball complex (above). The athletic department will then focus on renovations of Mott Gym (lower right). The football stadium will follow (lower left).

The new site, despite being constructed right on top of the sheep unit, rodeo grounds and other agriculture facilities, received unanimous support from the College of Agriculture's Land Use Planning Committee.

But they won't just set the sheep free when the unit has to be torn down. That could pose a problem.

Agriculture Professor Phil Doub said the committee has agreed to the project as long as the facilities are going to be replaced.

"We're going to have to realize that the university has to grow," Doub said. "We're not going to stand in the way."

Joseph Jen, dean of the College of Agriculture, expressed his support for the plans which will allow his department to build a much-needed, newer sheep unit.

As for the rodeo grounds, Sleeper said it will not be touched in the construction of the baseball complex.

However, when the time comes for the football stadium to be built, the rodeo area will need to be moved. But, Sleeper said, the rodeo grounds will be inexpensive to build.

In the beginning phase of this multi-million dollar project, McCutcheon has overcome one obstacle. He wanted total agreement on this plan to avoid any rift between athletics and academics. So far he has received it.

"This has to be a win-win situation for everybody," McCutcheon said. "We don't want to cause conflicts between one college and another."

Sleeper said once environmental impact reports have been completed, and the money has been raised, the baseball stadium could be functional for games within eight to nine months, which would please no one more than Price.

But Price knows it's an ambitious goal.

"If we're indeed going to play there next (year)," Price said, "we're gonna have to get going."

Mark Armstrong, who is a sophomore at Cal Poly, is a staff writer for the Mustang Daily. He can be reached via e-mail: mwarmstr@oboe.calpoly.edu

Cal Poly needs more than one Wizard

Ozzie Smith Field. Or maybe, Ozzie Smith Park. Whatever it is, Smith got his name on the new baseball stadium with his \$1 million contribution last Tuesday.

And why not?

The Wizard is the most successful professional athlete to come out of Cal Poly, and for \$1 million he could probably spray paint his name all over campus if he wanted to.

Smith's contribution to the Athletic fund doubles the total amount raised to \$1.7 million.

Where is the remaining \$18 million to fund the projects — Mott Gym renovation, football stadium and baseball/softball complex — going to come from?

The chairmen of the venture have told us where it's not going to come from: not from the state, or from another student referendum.

They are relying on alumni donations, fundraising, and the contributions from the city of San Luis Obispo.

Let's look at the alumni issue.

Most of the alumni contributions are given to the agricultural and engineering departments. There are more of them, and they tend to have a thicker wallet. But their wallets have probably been hit. And now Cal Poly expects them to contribute heavily to a baseball or football stadium?

If Cal Poly had the athletic alumni similar to

UCLA, USC or Stanford, it would be a much easier task to generate support for the idea. But we don't, and \$20 million in the next couple of years is not just going to appear.

It's doubtful that Cal Poly students are going to get too excited about seeing games in these new complexes. These "as soon as possible" commitments are ever too familiar.

The Rec Center is a perfect example. The building is completed and has supplied us with everything we could want in an athletic center. But do you think there are any students who are still here from when those plans were unveiled in 1986?

How about the new Performing Arts Center? The big plans were unveiled in 1991 and the project is still unfinished today. Although there were no student referendums for that building, the contributions that were received from the community were much greater than the athletic department can expect.

Seems to me that these projects have a long-term span. With another \$18 million to collect, you have got to be a crazed optimistic to think that you're going to use your student body card to get into these places.

Ultimately, putting together the money for the projects is not going to be easy. The hope is to have the baseball stadium ready for next year's Big West opener, and Mott Gym redone for the 1998 season. Hopefully the athletic department has some secret weapons, because, if not, these venues won't be finished in this century.

THE NBA

No joke - Kidd should stay home

Jason Kidd has done it again. Last season, Kidd played unremarkably through the first three months, then finished strong and forced a split with Grant Hill in the Rookie of the Year vote.

This season, Kidd played well, yet not spectacularly, before lifting his game in January. He had three triple-doubles in a six-game span, and in a two-week stretch averaged 23.3 points, 11.8 assists, 8.8 rebounds and 2.3 steals.

He delivered just as the voters were deciding who should start in the All-Star

Game. Kidd was the runaway fan choice.

A case could be made on whether Kidd deserves to go at all. Rod Strickland is averaging 20 points and is second in assists. John Stockton leads the league in assists. And Gary Payton is having his best season.

"I see John Stockton and Gary Payton as a helluva lot better than him," says Seattle SuperSonics Coach George Karl, who will coach the Western Conference All-Stars.

While it's true that com-

ments were made — mainly by Karl Malone — during Magic Johnson's last comeback attempt, there was one incident that was probably the major reason he walked away. It occurred during a preseason game between the Los Angeles Lakers and Cleveland Cavaliers in Chapel Hill, N.C., in October 1992.

Johnson, who has the HIV virus that causes AIDS, was cut during that game, and the Cavaliers scattered.

"I didn't know what the risks were," Cleveland center Michael Cage said. "I knew blood was one of the ways to get the virus. When he got cut, all of us freaked out."

Said teammate Terrell Brandon: "We reacted, and I think he saw that. It made the guys a little nervous."

So give the league credit for creating an atmosphere that, in less than four years, has allowed Johnson to return to the game he loves. The league has set up AIDS seminars to make players more aware of how the virus is transmitted.

"We didn't know what was going on," Brandon said. "We were naive (about) how you contract it. You can't get it by rubbing against someone."

THE NHL

Red Wings: No Apologies needed

The Detroit Red Wings and their team leader, Steve Yzerman, have been sensational this season, compiling the NHL's best record.

But they had it last season, too, and were swept in the Stanley Cup finals by the New Jersey Devils.

Listen to Yzerman, a 13-year Detroit veteran, and it is apparent that loss still stings. The team hasn't discussed its disappointment in last year's finals "a whole lot," he said, choosing instead simply to move on.

When he is asked why this team, which is four points ahead of last season's pace, can be trusted to maintain the performance in the postseason, he becomes just a little defensive.

"It's almost like we'd have to apologize for our record," he said. "It's like we should be 20-20-8 or something, instead of 35-9-4. But it's true our success in the playoffs is how we'll be remembered."

Besides having the four-game Cup sweep to deal with, Yzerman and the Red Wings have to answer questions about their own

Western Conference.

The situation isn't nearly so bad as in the NFL, where the National Football Conference has beaten the American Football Conference 12 straight years in the Super Bowl. But NHL Eastern Conference teams have won the Stanley Cup each of the past five seasons, and six of the Red Wings' losses this season have been to Eastern teams.

When Wayne Gretzky suggested the Los Angeles Kings acquire a 50-goal scorer, he didn't mean someone who might score 50 goals over the rest of his career. But that's what General Manager Sam McMaster got when he acquired left wing Kevin Stevens from the Bruins for right wing Rick Tocchet.

"Rick was very special to a lot of guys here," Kings right wing Tony Granato says. "No one would ever question his work ethic. He was probably our most popular player."

Tocchet, who was Gretzky's closest friend on the team, says he thinks the Great One definitely will be traded before March 20.

GAME of the WEEK

Pittsburgh (31-17)
at
Chicago (27-15)
Saturday, 12 p.m.

Pittsburgh update: The Penguins lost their third consecutive game Saturday when they fell to Detroit, 1-0. The Pittsburgh offense which boasts two of the top three goal scoring leaders -- Mario Lemieux and Jaromir Jagr -- is struggling, having scored just two goals in their three losses through Saturday.

Chicago update: The Blackhawks are trying to pick up ground on division-leading Detroit. After Sunday's 4-1 win over Anaheim, the Blackhawks are 5-0-2 in their last seven games.

Snow plow: Colorado's Joe Sakic has helped lead the Avalanche to first place in the Pacific.

Shaq left in shadows when spotlight turns

By ROB PARKER
Newsday

NEW YORK — A little more than a year ago, the National Basketball Association spotlight was solely on Shaquille O'Neal.

His size-22 shoes and all. You couldn't look anywhere without seeing Shaq. There were TV highlights, commercials, rap videos. You also couldn't listen to anything about the NBA and not hear about Shaq. With a pretty large spoon, we were force-fed a daily dosage of O'Neal, the wonderful 7-foot-1 Orlando Magic center.

And that's exactly the way the NBA wanted it.

After Michael Jordan walked away from the game and went off chasing his baseball dream, the league made it clear that it wanted O'Neal to take the banner and run with it. O'Neal was supposed to take the NBA into a new era.

On the way, though, Shaq was derailed.

You still see and hear about Shaq, but not with the same intense degree we used to.

It's no accident that the spotlight that used to engulf O'Neal's huge body now only shines on part of him. Without much choice, O'Neal has to share it now.

And not just with one other person.

Sure, Jordan's return has taken back most of that spotlight. But it's hard to think that anyone, even Shaq, could compete with Jordan when it comes to outshining him. Jordan's stellar play and three consecutive championships put him in a league by himself. Hence, the nickname, "His Airness."

But Jordan isn't the only one in O'Neal's way these days. Enter the Detroit Pistons' Grant Hill and his enormous popularity. Hill's almost too good to be true. He's nice, well-spoken and a damn good player as well. And his winning tradition at Duke doesn't hurt, either.

And let's not forget the emergence of Penny Hardaway. With

the way Hardaway has played in his third season in the NBA, it's hard to tell who's the best player on the Magic some nights.

And the light is, no doubt, getting even smaller now that Magic Johnson has rejoined the Los Angeles Lakers. Despite 4 1/2 years away from the NBA, Johnson's ability to attract fans hasn't diminished one bit.

"There's no question the spotlight is spread around a lot more than it was before," said Magic guard Nick Anderson before Orlando took on the Knicks at Madison Square Garden Thursday night. "With the two MJ's back, it's harder to be out front by yourself, but he still gets his share."

"And it hasn't been a problem for him. He hasn't changed much."

O'Neal, who had 18 points Thursday night in a subpar performance, wasn't available for comment before the game.

But players all around the league have noticed the spotlight shift, too.

"When you have players like Michael and Magic on the scene, there's no doubt that they command a certain amount of marketability with the league," said Charles Smith, who started in place of John Starks as Don Nelson went with four front-court players and Derek Harper at guard.

O'Neal's drop down the popularity ladder has nothing to do with his play on the court. Entering Thursday night's game, O'Neal was averaging 26.7 points and 11.2 rebounds and was shooting 63 percent from the field. And the drop has nothing to do with a change in Shaq's personality. He's full of it and has a smile that rivals Magic's. And that's saying a lot.

Still, it's not enough to have the league once again focus in on him.

With O'Neal out for the first 26 games of the season with a broken right thumb, Hardaway stepped forward and people took notice. Hardaway had a

November to remember, averaging 27 points, 6.5 assists, 5.8 rebounds and 2.2 steals. In the process, he led the Magic to a franchise-record 13-2 mark.

It's not that Hardaway didn't have a lot of success in his first two seasons, but things rightly centered on O'Neal.

"He stepped up big-time," Smith said. "With Shaq sidelined, his play showed up."

And although Hill is still playing for just a .500 Pistons club, his popularity is extremely high. Want proof? O'Neal and Hardaway are both on the Eastern Conference All-Star starting team with Hill. Jordan

and Scottie Pippen round out the squad.

But it was Hill, not Shaq, who was the leading vote-getter. Hill (1,358,004) beat out Jordan (1,341,422).

Some might say the reason for that is because O'Neal was injured early on. But when you're voting for All-Star teams, you don't vote on stats. It's a popularity contest. You like Shaq, injured or not.

"They are two different people, personality-wise," Smith said. "Grant's got that All-American image."

"He's very corporate, very businesslike. And not to say that

Shaq isn't."

It'll be interesting to see what course the NBA takes over the next year. Will it try to keep the focus on Shaq and Hill because they represent the future? Or will it stay with the safety of Jordan and Johnson, who although they represent mostly the past, are favorites the fans won't give up on.

It's easier for NBA Commissioner David Stern & Co. to go to corporations and sell Michael and Magic. It's not that Shaq has a negative tag. It's just that the other two have accomplished so much and are proven. At this point, O'Neal has shown

The formula used to calculate the ratings are compiled by using the team's winning percentage, the team's opponents overall winning percentage and the opponents' opponents overall winning percentage.
 Rating = (.25 x winning pct.) + (.5 x opp. winning pct.) + (.25 x opp. opp. winning pct.)
 Note: The formula only uses games between Division I opponents only.

WOODSTOCK'S PIZZA Laid Back?

Don't feel bad! Some of the "greats" were laid back...

George Washington:

So laid back it took him 3 weeks to chop down a
cherry tree with a small butter knife, because he
was too relaxed to go to the shed and get an axe!

Albert Einstein:

Had to become a Super Genius just so he had
an excuse not to comb his hair.

Henry Ford:

Invented the rolling chair. Need we say more.

Cable study reveals violent acts in TV shows often go unpunished

By Jeannine Aversa
Associated Press

WASHINGTON — Crime pays — at least on television, according to a cable industry study released Tuesday on TV violence.

Most of the time, the bad guys aren't punished; nearly half the time, violent acts in TV programs show no harm to victims, and more often they portray no pain, according to the survey of cable and broadcast shows.

"The world of television is not only violent — it also consistently sanctions its violence," said the report on the \$1.5 million study commissioned by the National Cable Television Association.

The study found a consistent pattern across all channel types and genres.

"This is troubling," the report said.

The survey, the largest of its kind, was based on a sample of 2,500 hours of programming on 23 channels — a mix of cable, broadcast and public television — from Oct. 8, 1994, to June 9, 1995. It was conducted by researchers at four universities.

"One of the clearest findings of this study is that a very high proportion of violent scenes lack any form of punishment for the perpetrators," the report said.

The study does not rate

specific programs, channels or stations for violent content.

The negative consequences of violence are usually not shown, the study also found. For example, 47 percent of all violent interactions show no harm to victims and 58 percent show no pain.

In addition, the study found that 57 percent of TV programs surveyed contain violence; roughly one-third of those shows contain nine or more violent interactions.

What effect does this have on viewers?

The study says it can desensitize people to both real violence and victims of violence, can increase people's fears of becoming a victim, and as many other studies have suggested, can lead to more aggressive behavior.

The highest level of visual violence — 61 percent — can be found on shows aired during prime time, between 8 p.m. and 11 p.m., the study found.

The study also found that premium cable channels most frequently air shows with violence, while basic cable channels are close to or below industry averages.

DIVERSITY: 'There is not enough to begin with'

From page 1

the enrollment numbers shouldn't really make any difference in the diversity of the students who actually come," Dalton said. "As long as we can develop financial aid to help people who have financial needs, then a change in fees would hopefully not do (diversity) in."

According to College of Science and Math Dean Philip Bailey, the benefits of a fee increase will be worth the extra money.

Bailey chairs the Educational Equity Commission, a committee that deals primarily with student issues such as student retention, campus climate and the admissions policy as it pertains to affirmative action.

"My understanding was that there would be sufficient amounts of money set aside to handle that fee increase for students of all backgrounds who are on financial aid," Bailey said. "If that is the case, then my impression was that it would not be a significant detriment."

There could even be an increase in diversity at Cal Poly because of the UC Regents' decision to eliminate affirmative action, Dalton said.

"I would speculate that it might actually help our diversity because if students don't feel welcomed into the UC system because of the change in policy they might be more inclined to come to the Cal State system," Dalton said. "This might even give up a stronger pool of diverse students."

Although most students gave blank stares on what the Cal Poly Plan is and how it would affect affirmative action, some, such as recreation administration junior Emily Strahle, were adamant that there is a lack of diversity on campus.

"In our major we're mostly white. I would like to see a more diverse group," Strahle said.

HOLIDAY: Committee considers other alternatives

From page 1

Freberg also acknowledged that many issues were being brought before the committee that she did not expect.

Union contracts and providing enough days for part-time teachers to be eligible for health coverage were only a couple of issues the committee has faced, she said.

"You need all of the input from each of the colleges. People spoke about issues that we never even thought about."

The instructional committee has one student representative to provide student input. However, Freberg encouraged additional feedback from students on the planning of future holidays. She can be reached via e-mail at lfereberg@calpoly.edu.

Freberg hopes to compile all feedback within the next two

weeks and forward a report to the Academic Senate voicing the committee's concerns. Following the report, the next course of action is to create an educational campaign regarding this issue, she said.

But Freberg said she is not too concerned about students' understanding of the issue.

"Cal Poly students are smart. The new permit process has gone without a hitch," she said. "I don't foresee any problems with students understanding the new holiday schedule."

Construction management junior Ben Rau said he would prefer a three-day weekend.

"Three-day weekends enable students to plan a trip or catch-up on studying during the quarter. With a holiday on the Friday before finals week, it doesn't seem like we're getting a break," Rau said.

NATIONAL BRIEFS

Should Magic play in the 1996 Atlanta Summer Olympics?

Atlanta (AP) -- For Pete Babcock, the issue of whether Magic Johnson should play at the Atlanta Olympics is simple.

"My personal feelings is we ought to select the two best players," said Babcock, general manager of the Atlanta Hawks. "If a player sat out 10 years, it wouldn't make a difference to me if he played well enough to earn a spot."

Babcock is part of the USA Basketball committee that will get together at the end of the NBA season to pick the final two members of the U.S. basketball team for the Atlanta Games.

Already, the third installment of the Dream Team includes Shaquille O'Neal, Hakeem Olajuwon, David Robinson, Scottie Pippen, Glen Robinson, Karl Malone, Grant Hill, Anfernee Hardaway, John Stockton and Reggie Miller.

Johnson played on the original Dream Team that won the gold at Barcelona in 1992. Last week, he rejoined the Lakers after a 4 1/2-year retirement and immediately began lobbying for a spot on the Atlanta team, noting his international experience.

"I know I can get out there and do my thing," said the 36-year-old Johnson, who had 21 points, seven rebounds and six assists in a victory Sunday night over Utah.

Candidates using Whitewater in their favor

By Marcy Gordon
Associated Press

WASHINGTON — Political foes are "trying to make hay" out of Whitewater in the presidential campaign, the White House asserted Tuesday, a day after President Clinton was ordered to testify in the trial of former real estate partners.

Press secretary Mike McCurry made his most pointed statements to date on the issue, saying the Clintons' "political enemies are determined to make this an issue" in the campaign.

"When the chair of the campaign of one of the presidential rivals continues to raise these matters publicly and raises them in New Hampshire on behalf of that candidate, I think it's fair to say they're trying to make hay out of the issue," McCurry said.

He was referring to Sen. Alfonse D'Amato, R-N.Y., the Senate Whitewater Committee chairman who also is a co-chairman of Republican Sen. Bob

Dole's campaign.

D'Amato, who campaigned last month in New Hampshire for Dole, has been especially critical of Hillary Rodham Clinton's role in Whitewater. He has contended she has not told the truth, and his panel threatened the White House in December with a court challenge over disputed Whitewater notes.

Dole, referring to Monday's subpoena in Arkansas for Clinton's testimony, said Tuesday, "I haven't made an issue of it and don't intend to. I'm the Republican leader. I think it would be improper for me to go out there and try to involve myself in something that's happening in another branch of our government."

In Little Rock, meanwhile, a federal court clerk signed the subpoena to carry out a judge's order that Clinton provide testimony in next month's trial of his two business partners in the failed Whitewater land deal.

White House lawyers want

Clinton to appear on videotape, but lawyers for Clinton's partners, James and Susan McDougal, say a personal appearance by the president would make his testimony more credible.

"I believe it's most likely, as the judge's order indicates, that he will submit videotaped testimony," McCurry told reporters. He said the venue will be determined after Clinton's lawyers consult Mrs. McDougal's lawyers under the court order.

On Capitol Hill, ongoing Senate hearings on Whitewater focused on Mrs. Clinton's legal work in Arkansas. A federal regulator testified that the recent discovery of her long-sought billing records raised new questions about whether her work for a failed Arkansas S&L created a conflict of interest.

McCurry said, "This Whitewater will be a fact of life for the Clintons as long as they are alive and certainly as long as

they are in the White House, and they live with it and move on and carry on their work on a variety of issues and don't let it get them down."

D'Amato has contended that Mrs. Clinton's billing records, recently discovered in the White House living quarters, show that she has not been truthful about her activities relating to a fraudulent Arkansas land deal known as Castle Grande.

Patricia Black, an associate inspector general for the Federal Deposit Insurance Corp., told a House hearing last summer that regulators had no evidence Mrs. Clinton worked on the Castle Grande transaction.

Mrs. Clinton was a partner in the Rose Law Firm, which represented Madison Guaranty before Arkansas regulators while Bill Clinton was governor. Madison is the failed savings and loan owned by the Clintons' Whitewater partners, the McDougal's.

CBEST teaching test being challenged in federal court

By Bob Egelko
Associated Press

SAN FRANCISCO — Former state school Superintendent Bill Honig testified in defense of California's qualifying test for teachers Tuesday, saying it measures skills that all teachers need.

The California Basic Educational Skills Test, or CBEST, is being challenged in federal court by groups of ethnic minority educators, who contend it bars a disproportionate number of ethnic minority candidates and has little to do with the actual work of a teacher.

CBEST has been required for all new teachers, counselors and administrators since 1983. The test consists of multiple-choice questions on reading comprehension and mathematics and several essays to measure writing skills.

As superintendent of public instruction, Honig established the first passing scores, requiring

"We thought that a teacher who is going to teach kids should be able to answer seven of 10 questions ..."

Bill Honig
Former state school Superintendent

70 percent correct in reading and 65 percent in math. An advisory panel that included teachers had suggested a lower passing score, but Honig defended his decision on the witness stand and in a later interview.

"We thought that a teacher who is going to teach kids should be able to answer seven of 10 questions at the mid-high school level," Honig said, referring to the state's assessment of the difficulty of the test. Teachers unable to meet that standard "can't read teachers' manuals," he told a reporter.

The state raised the passing score last year while eliminating questions on algebra and geometry.

The state says 538,000 people

have taken CBEST, 73 percent have passed on their first try and nearly 85 percent have eventually passed. For first-time test-takers, according to the plaintiffs, the passing rates have been 80 percent for whites, 38 percent for blacks, 49 percent for Hispanics and 53 percent for Asian Americans.

In testimony, Honig was questioned closely by a lawyer for the ethnic minority educators about why the state requires teachers in the elementary grades to take the same test as those who teach math and literature to high school students. Honig replied that the intellectual demands of teaching were similar at all grade levels.

"A lot's going on in those kids' minds," he said. "You have to be a very sophisticated person even if it's kindergarten, first, second, third grade."

"It's not just teaching them to read. There's a science to it," said Honig, author of a recent book on teaching reading. "Even simple stories have a point to them and asking the right question takes a certain verbal ability. ... You have to know how that (reading) process works."

In elementary math, to teach properly such concepts as fractions or even counting numbers, "you have to have a deep mathematical understanding" to avoid causing confusion later, he said.

Honig was forced to resign in 1993, during his third term as superintendent, after being convicted of felony conflict-of-interest charges for allegedly steering public money to his wife's private educational program. His case is on appeal.
